Two things today: check your commits, run your own AI team

今天兩件事：查你的 commit、帶兩個 AI 做事

Last week one AI built a page for you. Today two AIs work for you, and you do the checking.

上週一個 AI 替你做了網頁；今天兩個 AI 替你做事，驗收的是你。

A · B · D your commits

- D
- B v2
- B v1
- A

Leader · Wailan
領隊 · 洄瀾

Member · Taroko
隊員 · 太魯閣

→ my-team

You are the captain.
你是小隊長。

Checkpoint **First: student page, section 6 ①. Start installing both apps.**
先到學生頁第 6 節①，開始裝兩個 app

Same as last week: install both apps

照上週：裝兩個 app

This room is wiped at every restart, so we install again. You have done it once.

這間教室每次開機都清掉，所以再裝一次；你裝過一次了。

`ChatGPT app → Codex`

Leader · sign in 領隊，登入

+

`Antigravity`

Member · personal Gmail, 18+ 隊員，個人 Gmail、18 歲以上

→

`my-team`

the same team folder 同一個小隊資料夾

Under 18, or prefer not to verify a phone number? Pair up: same score.

未滿 18 或不想驗手機：配對，同分

Cloud: never type your name or student ID

內容上雲端：不打姓名、學號

Checkpoint **Both apps installing** 兩個 app 都在裝

Open your history page

打開你的歷史頁

Four commits of your own. One glance.

四筆你的 commit，一眼就知道。

Commits	sample
D	4c1e9b2
B v2	a73d0f5
B v1	9e2b6c8
A	1f8a4d3
Initial commit	0b5c7e1

Minimum check: three things

最低核對三件

1. A, B v1, B v2, D on the history page 歷史頁看得到四筆
2. Repo URL in your 156785 text 156785 線上文字有 repo 網址
3. Screenshot handed in 截圖交了

Initial commit at the bottom: normal for the template repo.

最下面的 Initial commit 是範本帶的，正常。

Not handed in yet? Finish A, B and D, commit and push each one, then submit to 156785.

還沒交？補完 A、B、D，每題 commit＋push，交到 156785。

✋ **Hands up: all four are there** 舉手：四筆都在

A teacher's five-river team

老師的五條河

They never talk to each other. They share one folder.

它們從不直接講話，只共用一個資料夾。

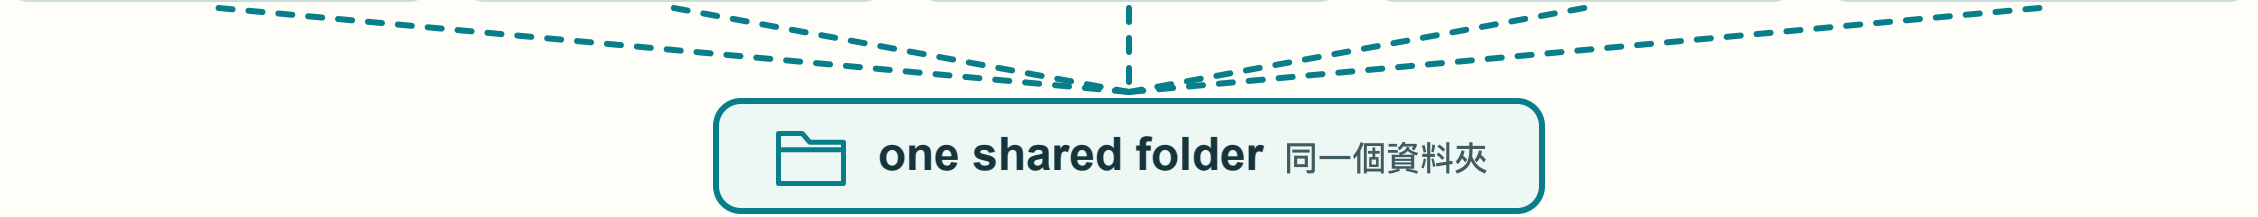

Wailan
迴瀾
Leader: plans, splits the work, checks at the end.

Liwu
立霧
Fast hands: builds and changes things.

Xiuguluan
秀姑巒
Many at once: splits a big job and searches wide.

Muguaxi
木瓜溪
Cheap first pass over a big pile of work.

Meilunxi
美崙溪
Latest news: what people say right now.

✋ **Which one would you hire first?** 你會先僱哪一位？

Passing notes: inbox, outbox, shared

傳紙條：收件匣、寄件匣、共用區

No magic link. One folder both can read.

沒有魔法連線，只有一個兩邊都讀得到的資料夾。

```
my-team/
├─ AGENTS.md
├─ leader.cmd · member.cmd
└─ workspace/
   ├── inbox/
   ├── outbox/
   └── shared/
       └── campus-picker.html
```

inbox/ The leader's task notes 領隊的任務紙條

outbox/ The member's work + one handoff line 隊員的成品＋一行交接

shared/ Files both read: your page, activities.json 兩人都讀：你的網頁、活動資料

Simplified: the “notes” are text files that both windows read and write.
簡化：「紙條」＝兩個視窗讀寫同一夾的文字檔。

Checkpoint **You can say what goes in each of the three boxes** 說得出三個格子各放什麼

Two apps, one charter

兩個 app、一份公約

AGENTS.md tells each one who it is, where notes go, and when to stop.

公約告訴它是誰、紙條放哪、何時停。

Codex
Leader · Wailan
領隊 · 洄瀾

Antigravity
Member · Taroko
隊員 · 太魯閣

→

AGENTS.md

1	Running on `Codex` → Leader; on `Antigravity` → Member 跑在哪個 app 決定角色
2	Where notes go 紙條放哪
3	Finish → stop → hand the baton back 做完就停、交回棒子
4	A handoff line: what, watch, ready? 交接寫什麼

✋ **What would you add to the charter?** 你會在公約加什麼？

Today's target

今天的目標

1. **Your two AIs write a one-page user guide for last week's picker: how to use it, and three things it cannot do.**
   替上週的挑選器寫一頁使用說明：怎麼用，加三件做不到的事。
2. **They may use only the files in `workspace/shared/`.**
   只准用 shared 裡的檔案。
3. **The member writes it. The leader checks it against the files and sends it back with at least one thing to fix, and the member fixes it as a new file. Keep v1 and v2.**
   隊員寫，領隊對著檔案驗收，至少挑一處退回，隊員另存新檔改成 v2。v1、v2 都留著。
4. **How you talk to them is up to you. `AGENTS.md` already tells them who they are and how to pass notes. Not following it? Tell it to read `AGENTS.md` again.**
   怎麼講你決定；不照公約，就叫它再讀一次。
5. **Hand in: three screenshots (the leader's first task note, v2, the leader's check) and one sentence: what did the leader catch?**
   交：三張截圖（第一張紙條、v2、領隊驗收）＋一句「領隊抓到什麼」。

Checkpoint **What is not in the files is not true.** 檔案裡沒有的就不算。

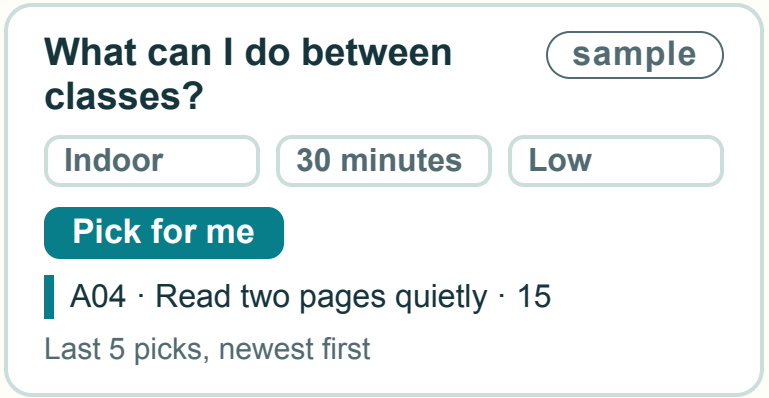

Play with the picker for one minute

玩一分鐘挑選器

The same picker you had AI build last week. Now look at what it actually does.

就是上週你叫 AI 做的那種挑選器，現在看看它真的會什麼。

1. Extract `ai-team-starter.zip` into Documents: that is `my-team`
   解壓縮到「文件」，就是 my-team
2. Double-click `workspace\shared\campus-picker.html`
   雙擊小隊資料夾裡的挑選器
3. Indoor · 30 minutes · Low → **Pick for me**; then make it say “No matching activities”
   室內、30、低 → 幫我選；再弄出一次「沒有符合」

Optional: use your own page from last week. Rename its `index.html` to `campus-picker.html` and put it in `shared`.
選做：改用你上週自己的網頁，改名後放進 shared 蓋過去。

Checkpoint **One pick and one “no match”** 抽到一個、弄出一次「沒有符合」

Same folder in both apps

兩個 app 開同一個資料夾

The number-one failure: two apps, two different folders.

全班最常卡：兩個 app 開到不同資料夾。

① **ChatGPT app: switcher → Codex → open `my-team` → New chat**
Codex 開 my-team

② **Antigravity: folder + → New Project → Add Folder → `my-team` → Create**
漏按 Create＝沒加

③ **Ask each one: who are you, which folder?**
各問一句你是誰、在哪

Codex — sample

```
I am the Leader, Wailan.
…\Documents\my-team
```

Leader

=

same path
同一條路徑

Antigravity — sample

```
I am the Member, Taroko.
…\Documents\my-team
```

Member

Antigravity · Terminal Command Auto Execution: not Always Proceed
不要選 Always Proceed

Approval window? Read it. Inside `my-team` → allow.
核准視窗：先讀，my-team 裡面就允許

Checkpoint **Two names, one path** 兩個名字、一條路徑

Done early? Same task, no baton

做完了？同一件事、不傳棒

Fast, but who checked?

快，但誰驗收了？

Manual relay
手動接力

Leader → You → Member → You → Leader

Auto
全自動

Leader → does it all, then reports → You

	Can you see the steps? 看得到過程嗎	How fast? 多快	Who checked? 誰驗收的
Manual	____	____	____
Auto	____	____	____

✋ **Would you hand in the auto version unread?** 自動那份你敢不敢不讀就交？

Two teams, v1 to v2

兩組小隊、v1 到 v2

Show what the leader caught, and what changed.

秀領隊抓到什麼、改了什麼。

Team 1

Leader caught: _____ 領隊抓到

v1 → v2: _____ 改了什麼

Team 2

Leader caught: _____ 領隊抓到

v1 → v2: _____ 改了什麼

Auto run

Hand it in unread? _____ 敢不讀就交嗎

Why: _____ 為什麼

Paper relay

Errors circled: _____ 圈到的錯

Your v2: _____ 你的 v2

✋ **Listeners: ask one question** 聽的人：問一個問題

Three sentences to keep

今天三句話

Split, hand off, check. What is not in the files is not true. Keep both versions.

拆、交接、驗收。檔案裡沒有的就不算。兩個版本都留著。

Split, hand off, check

拆、交接、驗收

The leader writes the note, then stops

領隊寫好紙條就停

You carry the baton

棒子你來傳

Files are the truth

檔案才算數

What is not in the files is not true.

檔案裡沒有的就不算。

“Done” is its claim. The check is yours.

做完是它說的，驗收是你的

Keep both versions

兩個版本都留著

v1 and v2 both stay

v1、v2 都留著

You can see what changed

看得到改了什麼

Homework **Opens on e-learning now. Copy my-team; close both windows. Next: 10/19 (Mon).** 作業現在在 e學苑 開；複製 my-team、關兩個視窗；下次 10/19（一）
