One target, one team, one trailer

一個目標、一個小隊、一支預告片

Today you hand in one card and one 30-second trailer. Everything else is how we get there.

今天交一張卡＋一支 30 秒預告片；其他都是過程。

One target

一個目標

You say it once, in your own words.

你講一次，用自己的話。

One team

一個小隊

The leader calls the member by itself.

領隊自己叫隊員。

One trailer

一支預告片

30 seconds, made by an AI with a skill. You check it.

30 秒，AI 用技能做；你把關。

Checkpoint **Student page: e-learning → Week 7. Section 2 first: OpenCode download; sign in to school Google.** 學生頁在 e學苑 Week 7；先第 2 節下載、登入 Google

Today's targets and the order

今天的目標與順序

Seven stops, one break. Say the target, then start your pictures while it runs.

七站、一次休息；講完目標就做圖。

1. **Why: by hand, by itself**
   為什麼：手動 → 自動
2. **Get set + work into shared**
   就位＋作品進 shared
3. **Say the target → start pictures**
   講目標 → 開始做圖
4. **14:10** break
5. **Back: look, finish pictures, rerun the skill**
   回座：看成品、再跑技能
6. **Check it**
   把關
7. **Three trailers**
   看三支
8. **Midterm 11/02 (Mon)**
   期中 11/02（一）

Hand in by 16:00: one card + one trailer → e-learning class assignment 16:00 前交：一張卡＋一支預告片 → e學苑 課堂作業

Checkpoint You know which stop we are at 知道現在在哪一站

Last week you passed the notes

上週紙條是你傳的

You no longer carry the notes, so you watch the record instead.

你不傳紙條了，所以改看紀錄。

Last week · manual relay
上週 · 手動接力

Leader → You → Member → You → Leader → You

two windows

Today · auto relay
今天 · 自動接力

You → Leader → Member → Leader → Member → Leader → You

one window

You lose: seeing each step as it happens
少了：每一步當場看到

You keep: inbox, outbox, out — every note and version stays on disk
還在：inbox、outbox、out 每張紙條每一版都留檔

🖐 **What can you no longer see?** 你少看到了什麼？

Three ways it can “succeed” and be wrong

三種「成功卻是錯」

Three error signals. “Passed” is also its claim.

三種錯誤訊號；「通過」也是它說的。

1

Wrong name tag, exit code 0

名牌叫錯，exit code 0

```
! agent "member" not found
… done
```

It printed “not found”, then did the whole job as the leader, and reported success.

印了 not found，用領隊名牌做完，照樣說成功。

2

Exit code 0 is not “done”

exit code 0 不等於做完

```
exit 0
outbox/ (no new file)
```

The command ended cleanly. No new file in the outbox means nothing was done.

指令乾淨結束，但 outbox 沒新檔＝沒做。

3

“The member is still running”

「隊員還在跑」

```
(stopped)
leader: “still running…”
```

It said the member was working. The member had already stopped.

它說隊員還在做，其實已經停了。

Checkpoint **You can name all three error signals without looking** 不看也說得出三種訊號

It typed the command wrong, then fixed it

它打錯指令，然後自己修好

Not an error signal: the one normal self-fix. Seen on 10/17 on the teacher's machine.

這不是錯誤訊號，是正常自救（10/17 老師機器實測）。

FIRST TRY

```
> opencode run --agent member "…""
ParserError
```

One quote too many. The call failed.

多打一個引號，呼叫失敗。

→

THE LEADER SAYS

The PowerShell quotes were wrong. Running it again.

「PowerShell 引號打錯了，重跑一次」

It saw the error and said what it would do.

它看到錯誤，說了要怎麼做。

→

SECOND TRY

```
> opencode run --agent member "…"
member · mimo-v2.6-flash-free
```

Worked. The member answered as the member.

成功，隊員以隊員身分回話。

🖐 **Did it tell the truth? How do you know?** 它有說實話嗎？你怎麼知道？

Get set: leader-auto.cmd

就位：leader-auto.cmd

One window. It calls the member by itself.

一個視窗，它自己叫隊員。

① **Extract `ai-team-starter-v2.zip` → `my-team`**
解壓縮到「文件」

② **Drag `opencode.exe` into `my-team`**
拖進 my-team

③ **Double-click `leader-auto.cmd`; do not press Tab**
雙擊 leader-auto.cmd；別按 Tab

leader-auto.cmd — sample

```
> who are you? which folder?
I am the Leader.
…\Documents\my-team
> run the member once, show me its first line
member · mimo-v2.6-flash-free
```

Leader MiMo-V2.6-Flash Free

Say: auto relay. Then `Leader ·` under the box; `member ·` 1–2 min after you ask
再看輸入框下 Leader ·；叫完 1–2 分 member ·

Hands up if: `leader ·` appears instead, or `not found`
看到 leader · 或 not found

"Update Available"? Press Esc or Skip, not Enter
按 Esc 或 Skip，別按 Enter

Checkpoint Leader ·, then member ·, then step 0 Leader → member → 第 0 步

Step 0: the AI installs its own tools

第 0 步：AI 自己裝工具

Today's tool use: the AI checks what it has and installs what it lacks.

今天的「AI 用工具」：它自己查缺什麼、自己裝。

ffmpeg
cuts and joins the video

Python
runs the skill's script

edge-tts · Pillow
free voice (probe + upgrade) · pictures

Only two sources, written in the skill: `winget`, or the official zip from gyan.dev 只准兩個來源，寫在技能裡：winget、或 gyan.dev 的官方 zip

Cannot install? It must stop and say so. You still hand in the card PDF + script v2. 裝不了？它要停下來說。你照交卡＋腳本 v2。

Checkpoint **It reports ffmpeg, Python, voice ready. While its screen moves: your work into shared.** 它報工具備齊；畫面在動就先把作品放進 shared

The target: say it now

目標：現在就講

1. **Auto relay. It calls the member itself; you carry no notes.**
   自動接力
2. **A 30-second trailer for the work in `workspace/shared/` (your own, or the picker).**
   30 秒預告片
3. **Script first: three shots, a caption ≤ 15 words + one or two lines of narration each, three facts with sources in `workspace/shared/` (file + line), a disclosure line: facts checked by you, not the AI.**
   腳本：三鏡、三事實附來源、揭露（人查核）
4. **v1 to `outbox`. The leader checks it against the files, sends it back once; the member saves v2 as a new file.**
   v1、退回一次、另存 v2
5. **Then the video with the `make-trailer` skill (no pictures yet = text cards).**
   再用技能做影片

Checked by three things

- **Every fact comes from a file in `shared`**
  事實只來自 shared
- **`outbox` has v1 and v2**
  outbox 有 v1 和 v2
- **`trailer.mp4` + the six check lines OK (offline: only `audio` may FAIL)**
  六行全 OK；離線只 audio 可 FAIL

Your words, once; it cannot see this page. Said it? Go make pictures.
講完別等，去做圖

Break: window open, no sign-out, no sleep.
休息：視窗開著、不登出

Checkpoint **What is not in the files is not true.** 檔案裡沒有的就不算。

Pictures: start now, finish after the break

做圖：現在開始、休息後做完

Start while it runs. After the break: look, finish, rerun the skill.

邊跑邊做；休息回來再跑一次技能。

Gemini — school account

Screenshot of your work, no names or faces in it. Three frames: opening, the work, closing. Give style, shot, words.

截圖不含姓名；開場、作品、結尾；風格、鏡位、字

`shot1.png` `shot2.png` `shot3.png`

Suno — optional

One track; over 30 s is fine, the skill takes what it needs. Sign in only, never pay.

可長於 30 秒；不付費

`music.mp3`

Flow — optional · 18+

One 8-second clip, replaces shot 2. Personal Gmail. Sign in only, never pay.

8 秒取代第 2 鏡

`shot2.mp4`

- ✕ **No real faces** 不用真人臉
- ✕ **No voice cloning** 不克隆聲音
- ✕ **No public upload** 不公開上傳

After the break: tell the leader to run `make-trailer` again with the new pictures (about 1–3 min, through the leader).

回來：用新圖再跑一次技能。

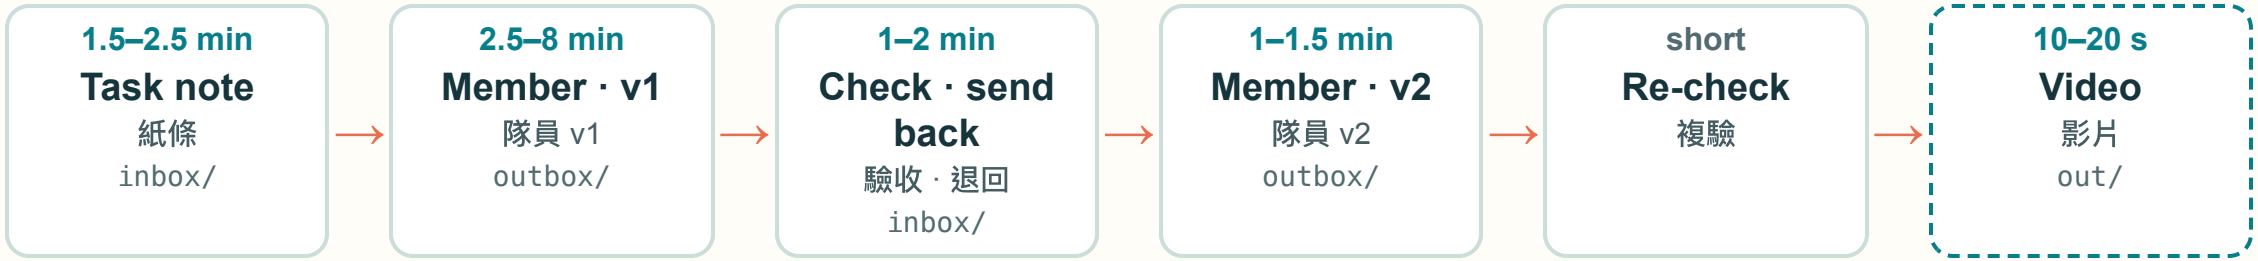

Checkpoint assets\ names exact; the skill ran once more 檔名一字不差；再跑過一次

Watch the relay

看接力

Watch, do not type. One round: 8–16 min; a moving screen means working.

一輪 8–16 分；畫面在動＝還在做。

1. **Reply's first line is lowercase `leader ·` (not the `Leader ·` under the box)**
   回話第一行小寫 leader ·
2. **"Done", but `outbox` has no new file**
   說做好了，outbox 沒新檔
3. **"Still running", but nothing changed for 3 minutes**
   說還在跑，畫面 3 分沒動

One normal self-fix: a wrong command it reruns itself; did it say so? 15:15, still no trailer.mp4 → section 8 (same score).

正常自救：打錯指令自己重跑，看它有沒有說。15:15 還沒影片→走第 8 節。

Checkpoint **inbox 2 notes · outbox v1, v2 · out trailer.mp4** 紙條兩張、v1 v2、影片

Check it: three claims, one frame

把關：三句主張、一格畫面

Every claim points to a file. Two more boxes: AI frame, leader's catch.

每句指回檔案；再兩格

Claim–Source–Verdict Card

card-aa.html

	Claim 1	Claim 2	Claim 3
Voice line (copied) 旁白句	____	____	____
Source: file + line 來源：檔案＋行	____	____	____
The original line 原文那一句	____	____	____
Verdict + why 裁決（採用 / 修改 / 拒絕）	____	____	____

Which frame was made by AI? How do you know?
哪格 AI 做的？怎麼知道

What did the leader catch? (its return note in `inbox`)
領隊抓到什麼？看退回紙條

At least one Revise or Reject. Three Adopts is not a check.
至少一句修改或拒絕

Watch `out/trailer.mp4` once, sound on. Read `out/check.txt`.
看一遍；讀 check.txt

Print → Save as PDF. No video? Card + script v2.
存 PDF；沒影片＝卡＋腳本 v2

Checkpoint **By 16:00: card PDF + trailer.mp4 (over 50 MB: a link)** 16:00 前交卡＋影片

Three trailers

三支預告片

Three trailers, drawn at random. Thirty seconds each, then two questions.

抽三支，各 30 秒，然後兩個問題。

Trailer 1

Leader caught: _____ 領隊抓到

You caught: _____ 你抓到

Trailer 2

Leader caught: _____ 領隊抓到

You caught: _____ 你抓到

Trailer 3

Leader caught: _____ 領隊抓到

You caught: _____ 你抓到

✋ **Listeners: what did the leader catch, what did you catch?**

聽的人：領隊抓到什麼、你抓到什麼？

Midterm 11/02 (Mon)

期中 11/02（一）

Your trailer is the opening of your booth, not the exam.

預告片≠考試

Bring one improved work from Weeks 2–7, named verifiable evidence, and one judgment card. Marks 15 / 10 / 5. Printed is fine; no public URL. Your trailer is the opening of your booth, not the exam.

帶一件 W2–W7 改良過的作品、具名可驗證證據、一張個人判斷卡；配分 15 / 10 / 5；可印刷、不需公開網址；預告片是攤位開場、不是考試本體

A3 poster, printed
A3 海報

One web page
網頁

Three slides
投影片

10/26: holiday, no class
10/26 放假

Marks: 15 improved work · 10 evidence · 5 judgment card (not today's card). Today's source checking = Week 7, examined; pictures, music, video = Week 8, not examined.

查證＝W7 考；圖音影＝W8 不考

Checkpoint **Hand in on e-learning · 11/02 (Mon) · scope Weeks 2–7** 交 e學苑 · 11/02（一）

Three sentences to keep

今天三句話

“Passed” is also its claim. What is not in the files is not true. See you on 11/02.

三句話。11/02 見。

“Passed” is also its claim

「通過」也是它說的

Three error signals, one normal self-fix

三種錯誤訊號、一種正常自救

You are still the last check

你還是最後一關

What is not in the files is not true.

檔案裡沒有的就不算。

Every fact: a file and a line in shared

每個事實：shared 的檔案＋行

Which frame did the AI make?

哪一格是 AI 做的？

See you 11/02 (Mon)

11/02（一）見

Midterm AI Maker Gallery

期中 AI 作品展

The trailer opens your booth

預告片是攤位開場

Before you go **Copy my-team · close the window · sign out of Google · next: 11/02 (Mon)** **複製 my-team、登出；下次 11/02（一）**
